

K-Love (91.1 in the Denver, CO area) is a refreshing change of pace on the airways. It is a safe and clean listening environment. I never have to worry about the content. Some mainstream stations are completely offensive, with K-Love I never have to worry about what my family may hear.

I play it in my car all the time, my teenagers now also play it in their car and friends driving with us, including my kids friends, ask what great station I have on. In an age of immorality, an anything goes type of mentality, and very much a time of moral and ethical decline it is nice to know there is someplace I can go to escape the degradation I have seen in our nation!
Please do not allow LPFM stations to have priority over this wonderful existing station called K-Love.
